DATA – KEY PERFORMANCE INDICATORS

Data KPIs. The performance of data services of CMOs has been checked by measuring User Data Throughput and Signal Strength Key Performance Indicators (KPIs).

User Data Throughput *This KPI defines user data rate (Internet speed) to be provided by Next Generation Mobile Services (NGMS) operators to mobile users across the coverage areas. The data throughput results of all NGMS licensees are as under:*

User Data Throughput (3G) (Threshold: > 256 kbps)

User data "throughput" of 3G services found higher than the benchmark value of 256Kbps

User Data Throughput (4G) (Threshold: > 2Mbps)

User data "throughput" of 4G services found higher than the benchmark value of 2Mbps

Network Accessability (Threshold: >99%)
